## APPLICATION FOR SUPERVISED PRACTICE EXPERIENCES

Contact the Department of Hospitality Management and Dietetics for admission requirements to the Coordinated Program in Dietetics and the Didactic Program in Dietetics. Note the deadlines for each program.

### Coordinated Program in Dietetics:

The Coordinated Program in Dietetics (Program I) combines the baccalaureate degree with the 1200-hour supervised practice experience required by The American Dietetic Association. This supervised practice experience takes place the last year of the degree program, and is termed the “Management Semester”, the “Clinical Semester”, and “Summer ‘Community’ Term”. This experience is equivalent to a post-baccalaureate dietetic internship experience and thus, like an internship, has special admissions criteria and procedures. The Coordinated Program accepts up to 15 students per semester. However, the program is not mandated to fill all slots each semester. Only those students who meet the following qualifications will be considered. Speak with the program director for further information on how candidates’ applications are scored.

Application to the Coordinated Program in Dietetics should be submitted during the semester the student is finishing up all coursework in the program with the exception of the courses listed in the Management and Clinical semesters (see reverse side of this page). The only courses the student would have remaining would be HMD 510, 517, 520, 521, 560, 561, 562 and 570. No other courses can be taken along with the Management and Clinical semesters without express permission of the admissions committee. If a student wishes to begin the Management in Dietetics semester in a fall term (August/September), the application must be postmarked by **February 15**. If a student wishes to begin their Management in Dietetics semester in a spring term (January), the application must be postmarked by **September 25**.

### Didactic Program in Dietetics

The Didactic Program in Dietetics (Program II) meets only the academic requirements set forth by the American Dietetics Association. The B.S. degree in dietetics qualifies the student to apply for a post-baccalaureate dietetic internship. Application to the Didactic Program in Dietetics should be submitted during the semester in which the student is enrolled in HMD 341, Principles of Food Production Management. Admission to the Didactic Program in Dietetics is required to enroll in HMD 490, 560, and 570.

Applications for a post-baccalaureate dietetic internship should be completed during the final year of the academic program. The student should check with each internship facility he/she is applying to for specific details and deadlines. Applications for internships beginning in August/September must be postmarked by **February 15**. Applications for internships beginning in January must be postmarked by **September 25**.
