

## **Student Learning Outcomes** **Bachelor of Science in Athletic Training**

**Standard 1: Evidence-Based Practice:** Students must possess the skills to incorporate available evidence, their clinical skills, and the needs of the patient to maximize patient outcomes. (K-State University SLOs: Knowledge, Communication, Diversity)

**Standard 2: Prevention and Health Promotion:** Students must possess the ability to develop and implement strategies and programs to prevent the incidence and/or severity of injuries and illnesses and optimize their clients'/patients' overall health and quality of life. (K-State University SLOs: Knowledge, Communication, Diversity)

**Standard 3: Clinical Examination and Diagnosis:** Students must possess the ability to clinically examine and diagnose a patient for the purpose of identifying (a) common acquired or congenital risk factors that would predispose the patient to injury and (b) review of the systems and regions to determine proper care including referral of the patient to other health care providers when appropriate. (K-State University SLOs: Knowledge, Critical Thinking, Communication, Diversity)

**Standard 4: Acute Care of Injuries and Illnesses:** Students must recognize, assess, and treat patients with acute injuries and illnesses and provide appropriate medical referral. (K-State University SLOs: Knowledge, Critical Thinking, Communication)

**Standard 5: Therapeutic Interventions:** Students must plan, implement, document, and evaluate the efficacy of therapeutic interventions into the treatment of injuries and illnesses of their patients. (K-State University SLOs: Knowledge, Critical Thinking, Communication)

**Standard 6: Psychosocial Strategies and Referral:** Students must possess the ability to recognize, intervene, and refer patients exhibiting abnormal social, mental, and emotional behaviors. (K-State University SLOs: Knowledge, Critical Thinking, Communication, Diversity)

**Standard 7: HealthCare Administration:** Students must possess the knowledge and skills to develop, administer, and manage a health care facility and associated venues that provide health care to athletes and others involved in physical activity. (K-State University SLOs: Knowledge, Critical Thinking, Communication, Academic and Professional Integrity)

**Standard 8: Professional Development and Responsibility:** Students must possess the knowledge and skills to understand professional responsibilities and avenues of professional development to promote athletic training as a professional discipline. (K-State University SLOs: Communication, Academic and Professional Integrity)
