Instructions

- Find your starting building on the top row.
- Find your destination building on the right column.
- Follow the chart until you find where the buildings intersect.
- Here you will find the distance between the buildings, time it takes to walk at average speed and amount of calories the journey takes.

*You may need to find your starting building on the right column first*

Ever wondered how many calories you burn going to class? How far you walk? Or how long it takes? Follow the instructions and find out!
